Fluke 3000 FC Series Wireless Multimeter with Fluke Connect

Fluke 3000 FC

The **Fluke 3000 FC Series Wireless Multimeter** is a state-of-the-art device for electrical maintenance and basic electronic troubleshooting. It's a full-featured multimeter that reads results wirelessly from remote [Fluke Connect®](#) wireless modules.

The Fluke 3000 FC measures AC and DC voltage up to 1000 V, AC and DC current, and temperature. It can simultaneously display up to four readings on a bright white backlit display.

This multimeter sends measurement data to your smartphone, allowing you to share it with your team anytime, from anywhere.

The Fluke 3000 FC provides all the facts right in the field. With its precision, reliability, and ease of use, it has all the essential electrical and electronic troubleshooting features professional technicians need.

It offers true-RMS voltage and current measurements, 6000-count resolution, manual and automatic ranging, plus frequency, capacitance, resistance, continuity, and diode measurements.

One of the critical features of the Fluke 3000 FC is its ability to reduce arc flash risk. It has been independently tested for safe use in CAT IV 600V/CAT III 1000 V environments. The Fluke 3000 FC DMM and Fluke Connect wireless modules put tools, not your body, near live electrical panels.

You can view the meter measurement and readings from up to three wireless modules on the same screen. By separating yourself from hazardous measurement situations, you can reduce the risk of arc flash.

The Fluke 3000 FC gives the complete picture in real-time. With Fluke Connect-enabled tools, you can connect multiple remote modules in different parts of the system and view the interaction between remote test points on a single screen in real time. You can create and email reports from the field or download the data to a PC for further analysis.

The Fluke 3000 FC connects to your smartphone through Bluetooth, so you can send measurement data from the meter to your phone and share it with your team anytime, from anywhere. Other valuable capabilities include recording measurements over time and monitoring changes live on your phone. You can share the results using Fluke Cloud™ storage and ShareLive™ video call. It provides

True-RMS voltage and current measurements with a 6000-count resolution.

The Fluke 3000 FC comes with a three-year warranty from the date of purchase. This warranty does not cover fuses, disposable batteries, or damage from accident, neglect, misuse, alteration, contamination, or abnormal conditions of operation or handling. You can contact your nearest Fluke-authorized service center for service during the warranty period.

In conclusion, the Fluke 3000 FC is a versatile and reliable tool for any professional technician. Its wireless connectivity and comprehensive features make it an invaluable asset in the field.

Reduces arc flash risk

Independently tested for safe use in CAT IV 600V/CAT III 1000 V environments, the Fluke 3000 FC DMM and Fluke Connect wireless modules put tools, not your body,

near live electrical panels. Just de-energize the cabinet, open the panel while wearing PPE, and connect the remote modules—voltage modules, current clamps, flexible current loops, or thermometers. Then read the results on the 3000 FC from a safe distance up to away. You can view the meter measurement, plus readings from up to three wireless modules, all on the same screen. And by separating yourself from hazardous measurement situations, you'll reduce the risk of arc flash.
