Harbor Freight US GENERAL 34 in x 23 in 6-drawer Full Bank Tool Cart

U.S. General 34" Full Bank Service Cart

The Harbor Freight U.S. GENERAL 34 in. x 23 in., 6-drawer, Full-Bank Service Cart fills a niche between the 27", 42", [44"](#) and 56" rolling cabinets, mechanic carts, and technicians carts. The full bank service cart is a heavy beast that approaches 400 pounds. Definitely not the best choice for mobile use. Mechanics and technicians like this type of open-top tool cart because an outlet strip can be added to keep all those Milwaukee Electric and Hilti power tools charged. I'm guessing this product targets buyers who want a snap-on but can't justify the expense. There's a lot of us out there that fit this description.

Once my team and I do a new maintenance shop layout, I can easily see purchasing matching full bank tool carts for my entire team.

U.S. General 34" Full Bank Tool Cart Overview

The Harbor Freight U.S. General 34" Full Bank Tool Cart features a 6-drawer setup optimized for tool storage with 18,700 cu. in. of total storage volume and a weight capacity of 1200 lb. With rolled edge drawers, full-width drawer latches, pre-cut drawer liners, corner bumpers, and an integrated power port for charging

tools when the lid is closed, this cart is loaded with the features you need, and you can secure all the drawers utilizing an integrated barrel lock. Durable full-extension ball bearings and a tough powder-coated finish mean this cart is up to the task at hand, whether it's in the local automotive shop or in your own garage.

The U.S. GENERAL cart line is designed internally by our Harbor Freight engineering team to precise industry-leading standards, and every specification and feature is rigorously tested in our state-of-the-art testing facility in the USA. The combination of quality materials, precise standards, and rigorous testing provides peace of mind, knowing this cart is high quality and resilient for a long service life.

- 18,700 cu. in. of storage space to hold a large amount of tools
